

ILLUSTRATIVE SAMPLE — NOT YOUR CV

What a resume rewrite actually changes

This document shows one complete rewrite, start to finish, so you can judge the work before you send anything or pay anything. The person in it is invented and the employers are fictional. It is built around a healthcare profile, but the method is the same in any field — your own rewrite would be built from your actual CV, your actual roles and your actual numbers.

What is inside

- **Page 2 — Before.** A CV of the kind that quietly gets filtered out, with the specific problems marked.
- **Page 3 — After.** The same person, same facts, nothing invented, rewritten in full.
- **Page 4 — What changed and why.** Every edit, and the reasoning behind it.

Your free sample, when you are ready

Send your current CV as a Word file, a Google Doc link, or a PDF whose text can be selected. I rewrite the top third of it — your headline, your summary and your most recent role — and send it back free, the same day if it reaches me before 6pm IST.

Please do not send a scan or a phone photograph. Text read out of an image carries small errors — a transposed date, a mangled qualification — that are hard to spot and expensive to find later. If a scan is all you have, say so and I will tell you honestly whether it is workable before you commit to anything.

If you want the full rewrite afterwards

Fixed at ₹1,500, and ₹750 with the LAUNCH50 first-project offer running to 30 September 2026. Resume plus matching LinkedIn profile is ₹2,500, so ₹1,250 with the same offer. Nothing is payable until you have approved the finished work. Up to 5 rounds of revisions, and a 100% money-back guarantee if it still is not right.

On method, plainly: I use AI assistance for the first pass and then edit the result line by line myself. Every claim that ends up on your resume is checked against what you actually did. Nothing is invented, inflated, or borrowed from a template.

CURRICULUM VITAE

A. SAMPLE CANDIDATE

Father's Name: Mr. R. Candidate | Date of Birth: 14/08/1996 | Marital Status: Single
Nationality: Indian | Languages Known: English, Hindi, Telugu
Mobile: 98XXXXXXX | Email: sample.candidate@email.com

CAREER OBJECTIVE

To obtain a challenging position in a reputed organisation where I can utilise my skills and knowledge for the growth of the organisation as well as for my career development.

WORK EXPERIENCE

Senior Executive — Pharmacovigilance

Sample Life Sciences Pvt. Ltd., Hyderabad (2022 – Present)

- Responsible for case processing activities.
- Handling of adverse event reports as per company SOPs.
- Involved in data entry in the safety database.
- Coordinating with team members and reporting to the manager.
- Participated in audits and other departmental activities.

Executive — Drug Safety

Sample Clinical Services, Hyderabad (2019 – 2022)

- Worked on ICSR processing.
- Assisted seniors in various activities assigned from time to time.
- Maintained records and documentation.

EDUCATIONAL QUALIFICATION

B. Pharm, Sample University, 2018, 72%

Intermediate, Sample Junior College, 2014, 81%

SSC, Sample High School, 2012, 88%

SKILLS

Hard working · Good communication skills · Team player · Quick learner · MS Office · Ability to work under pressure

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.

- 1. The first 40mm of the page sells nothing.** Date of birth, father's name and marital status are the first things a recruiter reads. None of it affects the hiring decision, and in several markets it invites a discrimination problem the employer would rather avoid.
- 2. The objective describes what the candidate wants.** The reader is deciding whether to spend forty-five minutes interviewing her. A sentence about her own career development does not help them decide.
- 3. Every bullet is a duty, not a result.** "Responsible for case processing activities" is true of every person who has ever held the job. Nothing here separates this candidate from the other two hundred applicants.
- 4. There is not a single number on the page.** No case volumes, no quality scores, no timelines, no team size. Six years of real work, and nothing to measure it by.
- 5. The keywords a screening system looks for are missing.** No Argus, no MedDRA, no E2B, no ICH-GCP, no aggregate reporting. The experience is almost certainly there; the words are not, so an automated filter never sees it.
- 6. The skills list is a list of adjectives.** "Hard working" and "quick learner" are unverifiable and appear on nearly every CV, which makes them worth nothing.

A. SAMPLE CANDIDATE

Pharmacovigilance Specialist | ICSR Case Processing · Signal Support · Aggregate Reporting

Hyderabad, India · 98XXXXXXX · sample.candidate@email.com · linkedin.com/in/samplecandidate

SUMMARY

Pharmacovigilance professional with six years in drug safety across a CRO and a mid-size pharmaceutical sponsor, processing 1,200+ ICSRs annually across clinical-trial and post-marketing sources. Consistently held 98%+ quality scores against internal audit criteria and met expedited regulatory submission timelines without a single late case in three years. B. Pharm, trained in Argus Safety, MedDRA coding and ICH-GCP.

CORE SKILLS

Safety operations: ICSR case processing (clinical & post-marketing) · seriousness and expectedness assessment · narrative writing · duplicate detection · follow-up management

Regulatory: expedited reporting (7/15-day) · E2B(R3) submissions · CIOMS-I · aggregate reports (PSUR/PBRER support) · ICH-GCP

Systems & coding: Oracle Argus Safety · MedDRA · WHO-DD · Veeva Vault · Excel (pivot tables, lookups)

Quality: SOP authoring and review · internal and sponsor audit support · CAPA documentation · new-joiner training

EXPERIENCE

Senior Executive, Pharmacovigilance — Sample Life Sciences Pvt. Ltd., Hyderabad

March 2022 – Present

- Process 100–120 ICSRs per month end to end — intake, data entry, MedDRA coding, narrative and quality check — across clinical-trial and spontaneous post-marketing sources.
- Maintained a 98.6% case quality score across 2024–25 internal audits, against a departmental target of 95%.
- Submitted every expedited case within the 7- and 15-day windows for three consecutive years, with zero late submissions recorded.
- Rewrote the team's duplicate-search work instruction after a near-miss, cutting duplicate cases entering the database by roughly 40% over the following two quarters.
- Supported four PBRER cycles, preparing line listings and case-level summaries for the medical writing team.
- Trained six new joiners on Argus workflow and narrative standards; three were signed off as independent processors within the eight-week target.
- Acted as case-processing point of contact in two sponsor audits and one internal quality review, with no critical findings raised against the cases reviewed.

Executive, Drug Safety — Sample Clinical Services, Hyderabad

July 2019 – February 2022

- Processed roughly 80 ICSRs per month for three sponsor accounts, progressing from data entry to full case handling within eleven months.
- Reduced personal average case turnaround from 3.2 days to 1.8 days over an eighteen-month period while holding quality above target.
- Reconciled safety and clinical databases for two Phase III studies, resolving discrepancies ahead of database lock on both.
- Drafted and revised four SOPs and work instructions adopted by the wider drug-safety team.

EDUCATION & TRAINING

B. Pharm — Sample University, 2018

Certified in ICH-GCP (2021, refreshed 2024) · Oracle Argus Safety end-user training (2019) · MedDRA coding workshop (2023)

Nothing above was invented. In a real rewrite, every figure on this page comes from the client — from their appraisal documents, their own records, or a ten-minute conversation where I ask the questions that surface numbers people forget they have. If a number cannot be supported, it does not go on the page.

What changed, and why

The same six years of work. Only the presentation is different.

THE CHANGE	WHY IT MATTERS
Personal details removed	Date of birth, father's name, marital status and the declaration line all came out. They occupy the most valuable space on the page, influence no hiring decision, and create a discrimination exposure most employers now actively avoid.
Objective replaced with a headline and summary	A recruiter gives the top of a CV a few seconds. The rewrite now answers, in that space, what she does, for how long, at what scale and how well — instead of what she wants.
Duties rewritten as outcomes	"Responsible for case processing activities" became "process 100–120 ICSRs per month end to end... 98.6% quality score." The work did not change. What changed is that the reader can now tell whether she is good at it.
Numbers put in	Case volumes, quality scores, turnaround times, training counts, audit outcomes. Numbers are what make a claim checkable, and a checkable claim is the only kind that carries weight in an interview.
Real keywords added	Argus, MedDRA, E2B(R3), CIOMS-I, PBRER, ICH-GCP, WHO-DD. These are the terms both screening software and a hiring manager scan for. The experience was always there — the vocabulary was not.
Adjective skills replaced with capabilities	"Hard working" and "quick learner" say nothing and appear on almost every CV. They were replaced with grouped, specific, verifiable competencies.
Structure made ATS-safe	Single column, no tables or text boxes, standard section headings, real dates in a consistent format, contact details in the body rather than a header. These are the things that most often cause parsing software to drop or scramble a CV before a person ever sees it.
Length allowed to follow the content	Six years with two genuinely distinct roles earns the space it takes. Nothing was padded to fill a page, and nothing useful was cut to fit one.

What your own rewrite would need from you

- Your current CV in a digital, exportable format — Word, Google Doc, or a PDF whose text can be selected.
- Which part of the medical field you are targeting — clinical practice, nursing or allied health, pharma and life sciences, hospital operations, coding and billing, or medical writing. They read as different jobs to different recruiters.
- One or two real job postings you would apply to, if you have them in mind. Writing against a real posting beats writing against a category, every time.
- What is actually going wrong right now — applications disappearing, interviews not converting, or a change of track the CV has not caught up with. This decides what goes in the top third.

What you get

- The finished resume as both an editable Word file and a PDF, yours to keep and edit.
- ATS-safe single-column structure, achievements rewritten around real numbers, keywords matched to the roles you are actually targeting.
- Up to 5 rounds of revisions after delivery.
- Nothing payable until you approve the finished piece. If it is still not right after those rounds, you pay nothing — 100% money back.
- Your CV is used only for your work. Never shared, never published, never added to any list.
